WE CLAIM:

5

- 1. An anti-IFNAR1 monoclonal antibody that inhibits the anti-viral activity of a first type I interferon and does not inhibit the anti-viral activity of a second type I interferon selected from the group consisting of IFN- α A, IFN- α B, IFN- α _{II}1, and IFN- β .
- 2. The monoclonal antibody of claim 1 wherein the second type I interferon is IFN-β.
- The monoclonal antibody of claim 2 wherein the first type I interferon is selected from
 the group consisting of IFN-αA, IFN-αB, and IFN-αG.
 - 4. The monoclonal antibody of claim 3 that inhibits the anti-viral activity of IFN- α A, IFN- α B, and IFN- α G.
- 15 5. The monoclonal antibody of claim 4 that is designated 4A7, having ATCC Deposit No. HB12132.
 - 6. The monoclonal antibody of claim 4, wherein the antibody recognizes a conformational epitope on IFNAR1.
 - 7. The monoclonal antibody of claim 6, wherein the antibody does not bind to a peptide consisting of the amino acid sequence of domain 1 (amino acids 1-200) of IFNAR1 and does not bind to a peptide consisting of the amino acid sequence of domain 2 (amino acids 204-404) of IFNAR1.
 - 8. The monoclonal antibody of claim 4 that binds to one or more amino acids in situ in the

20

sequence of amino acids 244-249 of IFNAR1, and binds to one or more amino acids in situ in the sequence of amino acids 291-298 of IFNAR1.

- 9. The monoclonal antibody of claim 8 that binds to amino acids 249, 291 and 296 of5 IFNAR1 in situ.
 - 10. The monoclonal antibody of claim 9 that is designated 2E1, having ATCC Deposit No. HB 12133.
